

Reflective Marker II - Aximum

Uses

Yellow bollard with blue reflecting sheeting to install at taxiway edge and apron.

Features

- The body and vessel are made with polypropylene high density (PEHD) and UV treatment.
- Equipped with a blue reflective sheath. Has a flange to prevent the sheath moving.
- Beacon dimensions:
Total height: 555 mm
Diameter: 75 mm
Sheath height: 240 mm
- Equipped with an inset vessel on the ground, which guarantees the clamping.
- Usable with or without blue sheath.
- Beacon color: Yellow
