Uses

Blue taxiway edge reflective marker, omnidirectional, for taxiway edge, apron edge and taxiway centerline for helipads.

Features

- Polypropylene pole at 35cm maximum height, a blue reflective film with a greater viewing surface at 150cm² or three reflective stripes with the same color yellow/green/yellow, for the axle taxiway in helipads.
- The pole is designed to turn back to the start position after a vehicle impact, ensuring 75 times after a vehicle collision at 88km/h from any direction.
- It is not necessary any electrical supply and maintenance.
- Fixing to the pavement using a mounting plate and fixing clip for the reflective marker.
